

Individual Methodology for Patient Volume Reporting

At more than one location...

Dr. Jones

Dr. Jones works at
two locations

Raleigh location of ABC Healthcare

Durham location of ABC Healthcare

Dr. Jones may use encounters from multiple locations, but is not required to report on more than one location, but it is required to report on at least one location with certified EHR technology. She has two options for reporting patient volume from either or both locations using individual methodology for multiple locations:

1. She can report the number of encounters she (and she alone) has had in a consecutive 90-day period ; or,
2. She can report the number of patient encounters that she has had, **and** the patient encounters of staff she directly supervises, during the same consecutive 90-day period .

In other words, if Dr. Jones supervises any staff, such as X-Ray Technicians, Registered Nurses, Lab Technicians, etc., she can count their total patient encounters toward meeting her patient volume threshold. Please note, EPs are required to report on at least one location with certified EHR technology.

Regardless of the encounters Dr. Jones chooses to count toward patient volume, she will need to be consistent in applying the encounters in both the numerator and denominator.
