(NCTR)**

Data Dictionary

NCTR Data Dictionary

HIPAA Information

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) was enacted to provide legal protection against the inappropriate use of individually identifiable health information. The major emphasis of HIPAA is on patient confidentiality and privacy through a standardized approach to physical and software data security and through a structured approach to transmitting data with patient identifiable components.

A Privacy Officer has been appointed for the NCTR, who is responsible for oversight of all privacy-related issues.

A security officer also has been appointed who will be responsible for the oversight of all security-related issues, including revocation of user privileges, and technical and physical security plans. Technical security measures include user access and authorization, password protection, data encryption and transmission, and monitoring of NCTR use. Physical safeguards include protection of NCTR hardware and data, backup plans, and disaster recovery plans.

Legislation

The North Carolina Office of Emergency Medical Services (NCOEMS), under the authority of Section 143-518 of the North Carolina General Statutes, as implemented by 10A N.C.A.C. 13P.201(7), has the legal authority to collect and maintain identifiable data at the state level. The NCTR is a function of the NCOEMS, which is an agency of the North Carolina Department of Health and Human Services. *As a state public health authority, NCOEMS is not a covered entity under the Health Insurance Portability and Accountability Act of 1996 (HIPAA).* Hospitals who provide data to the NCOEMS may do so pursuant to 45 C.F.R. 164.512(b)(1). *No business associate agreement is required* . The applicable legislation is as follows:

Section 143-518. Confidentiality of patient information

(a) Medical records compiled and maintained by the Department or EMS providers in connection with dispatch, response, treatment, or transport of individual patients or in connection with the statewide trauma system pursuant to Article 7 or Chapter 131E of the General Statutes may contain patient identifiable data which will allow linkage to other health care-based data systems for the purpose of quality management, peer review, and public health initiatives.

These medical records and data shall be strictly confidential and shall not be considered public records within the meaning of G.S. 132-1 and shall not be released or made public except under any of the following conditions:

- (1) Release is made of specific medical or epidemiological information for statistical purposes in a way that no person can be identified.
- (2) Release is made of all or part of the medical record with the written consent of the person or persons identified or their guardians.
- (3) Release is made to health care personnel providing medical care to the patient.
- (4) Release is made pursuant to a court order. Upon request of the person identified in the record, the record shall be reviewed in camera. In the trial, the trial judge may, during the taking of testimony concerning such information, exclude from the courtroom all persons except the officers of the court, the parties, and those engaged in the trial of the case.
- (5) Release is made to a Medical Review Committee as defined in G.S. 131E-95, 90-21.22A, or 130A-45.7 or to a peer review committee as defined in G.S. 131E-108, 122C-30, or 131D-21.1.
- (6) Release is made for use in a health research project under rules adopted by the North Carolina Medical Care Commission. The Commission shall adopt rules that allow release of information when an institutional review board, as defined by the Commission, has determined that the health research project:
 - a. Is of sufficient scientific importance to outweigh the intrusion into the privacy of the patient that would result from the disclosure;
 - b. Is impracticable without the use or disclosure of identifying health information;
 - c. Contains safeguards to protect the information from redisclosure;
 - d. Contains safeguards against identifying, directly or indirectly, any patient in any report of the research project; and
 - e. Contains procedures to remove or destroy at the earliest opportunity, consistent with the purpose of the project, information that would enable the patient to be identified, unless an institutional review board authorizes retention of identifying information for purposes of another research project.

(7) Release is made to a statewide data processor, as defined in Article 11A of Chapter 131E of the General Statutes, in which case the data is deemed to have been submitted as if it were required to have been submitted under that article.

NCTR Data Dictionary

Introduction

This document, the North Carolina Trauma Registry (NCTR) Data Dictionary, was created using the data dictionary published by the National Trauma Registry of the American College of Surgeons (NTRACS), with modifications specific to the North Carolina Trauma Registry. It is to be used in lieu of the NTRACS data dictionary.

It provides a brief summary of every data point used in North Carolina, and notes where there are custom options standard throughout the State. It does not cover those data items that are customized or used by each site specifically and not used statewide.

Some data points are optional to download to the State, i.e., the North Carolina Trauma Registry (NCTR) Central Data Collection Agency (CDCA). These data points are noted with a "O" in the Opt/Req column. Therefore, the statewide registry will not include these data points for each hospital, although each individual hospital has them within their local registry.

Other data points are required to be downloaded to the State. These data points are noted with an "R" in the Opt/Req column that indicates the data point is required to be downloaded to the State each quarter. While required data points are always sent to the CDCA, they are not always relevant to a particular event. Required data points are to be completed as thoroughly as possible as relevant to the event for each patient. For Example, if a patient presented to the hospital by private vehicle, the only Pre-hospital data item necessary to complete would be <Scene EMS Report> indicating that the patient was not transported by EMS or if no orthopaedic surgeon was called to see the patient in the ED, those fields related to the orthopaedist being called would not be completed.

The third option in the Opt/Req column is "X". X" is used to indicate that a custom data point is no longer being used and the data should be collected through a standard data point. If the data point values have not been moved to a standard data point then the data item should continue to be downloaded, if the values have been moved to a standard data point then the data item does not have to be downloaded to the state.

The section labeled *Data Point History* describes the history of changes to each data point and/or discussion, issues, or notes regarding the data point. Each change or comment is dated. This information was added in the Jan 2001 version of this data dictionary, but moved to a separate sheet in May 2007.

The column *Deactivated Values* contains values that were once actively used values in the Trauma Registry, but they are no longer used. If these values appear in a pick list, it is important to deactivate these values so they remain as valid values in previous records, but they no longer appear in the active pick list options. Do not delete these values, because they are still valid for previously entered records

The column *Current Default* contains the current default value for each data point. This column was added to facilitate checking default values in NTRACS without having to review the entire list of values to find the default

NCTR Data Dictionary

NCTR Patient Definition

Patients who have an ICD9 diagnosis code in 800-959.9 and who are either admitted to the hospital for greater than 23:59 hours (24 hours or more) from an ED, die in the ED, are DOA, are transferred from the ED to the OR or ICU, or who are transferred to another hospital should be entered into the Trauma Registry.

Minimum Requirements for Data Entry

- a. Data verification: Data must be verified by each hospital prior to being sent to NCTR.
- b. Records on 100% of patients must be entered into the NTRACS data system within 90 days of death, transfer, or discharge from the hospital. The Reimbursed Charges data point should be completed at 6 months from the date of death, transfer, or discharge from the hospital.
- c. Downloads are due during the first month of each quarter and no later than the last day of that month, Jan 31, Apr 30, Jul 31, and Oct 31 of each year. Downloads must include all records for patients who died, were transferred, or were discharged 90 days or more prior to the download date.
- d. Data submitted to the CDCA must include valid entries in all required fields marked for submission to the CDCA in the latest version of the NCTR Data Dictionary.
- e. In years that a hospital has a site visit, records must be entered into the NTRACS data system to meet the requirements listed in the current site visit chart selection document which can be accessed through the NC-OEMS website (<http://www.ncems.org>).

Data Validation and Standardization

Currently there are two requirements for validation and standardization:

- a. NCTR Data Dictionary. Errors are reflected in the NCTR quarterly quality control (QC) reports.
- b. NC Registrar's Data Validation Policy. (Policy may be found at www.nctrtrauma.org)

Hospitals primarily must be compliant with the NCTR Data Dictionary. Hospitals are responsible for correcting all errors in all QC reports provided by the NCTR CDCA. Hospitals secondarily must comply with the NC Registrar's Data Validation Policy developed by the NC Trauma Registrar Data Validation Subcommittee and approved by the State Trauma Advisory Committee (STAC). Validation and correction of errors identified through validation are to occur prior to submission of data to the NCTR CDCA each quarter.

Value Definitions

There are certain alpha numeric values used within NTRACS that are not inherently self-explanatory. An explanation of those values appears below.

Numeric Values	Character Values	Definitions
-1	Not Done/Doc (D)	Item was either not done or was not documented (no longer used)
-3	Pending	Getting the information is pending (no longer used)
-4	Not Recorded (V)	The data point was not touched & was left as the default value
-5	Not Available (X)	Looked for the information, but could not find it
-6	Not Performed (Z)	The procedure was not performed

NCTR Data Dictionary

April 1, 2005

I. Deactivations

The following Version 2.5 (V2.5) options may be deactivated from the pick lists; it is important not to delete the options as they are still valid for previous versions.

- 1
- 3
- D
- Not Done/Doc
- Pending

II. New Lists

In addition to the Hospital and Chemical Sedation lists there are 2 new lists as follows:

- EMS Provider List
- EMS_ReferHosp Drugs

Do not feel that you need to add all of the Hospitals, EMS Providers, EMS Drugs or Referring Hospital Drugs to the pick lists at once. The values may be added as they are needed, but be sure not to add any items to the pick list that are not on these approved lists. If you need to add any other values, please contact Holli Hoffman to have the values added to the approved list.

III. New Data Items

On the Injury Screen there is a second E-Code field enabling 2 codes to be assigned to a patient when the need arises.

On the Diagnosis Screen there is a new, auto calculating data item (NISS). The NISS is calculated by adding the top 3 AIS scores squared. This differs from the ISS score in that the top 3 could all be in the same body region.

May 14, 2007

I. New Lists and Sections

A section regarding HIPAA Information has been added to the front of the data dictionary

A separate section dedicated to data point history has been added

The EMS and Referring Hospital Drug Lists have been separated into two lists; while the lists currently match there is a potential for the Referring Hospital to have a separate list of drugs

II. Modifications

Please note the following sections and review them as necessary as they have been modified recently

- Introduction
- Table of Contents
- Format of Data Dictionary

II. Optional Data Points

Optional data points will be deleted from the state registry and will not be available for research.

NCTR_Data Dictionary TOC

No	Data Point	Tab	Description of Data Point
1	MedRecNo	Demographics	Listed as Patient Identifier on screen.
2	SocSecNo	Demographics	Patient's Social Security #
3	PFName	Demographics	Patient's first name
4	PMI	Demographics	Patient's middle initial
5	PLName	Demographics	Patient's last name
6	Sex	Demographics	Patient's gender
7	Race	Demographics	Patient's race
8	DOB	Demographics	Patient's date of birth
9	Man_Age	Demographics	Manual entry of patient's age
10	Age	Demographics	Patient's age
11	PAddress	Demographics	Patient's home address
12	PAddrss2	Demographics	Additional line for patient's home address
13	PCity	Demographics	Patient's home city
14	PState	Demographics	Patient's state of residence
15	PZIPCode	Demographics	Patient zip code
16	PCounty	Demographics	Patient's home county
17	PCountry	Demographics	Patient's home country
18	Occupation	Demographics	Patient's occupation
19	InjDate	Injury	Date of injury
20	InjTime	Injury	Time of injury
21	InjCity	Injury	City in which injury occurred
22	InjState	Injury	State in which injury occurred
23	InjZIP	Injury	Injury Zip Code
24	InjCounty	Injury	County in which injury occurred
25	InjCountry	Injury	Country in which injury occurred
26	ECode	Injury	Main term to describe accident: ICD-9 E-codes
26.1	ECode2	Injury	Secondary term used to describe the incident: ICD-9 E-codes
27	Blunt	Injury	Type of injury
28	InjSite	Injury	Location where injury occurred
29	CrashRpt	Injury	Police report number
30	Position	Injury	Position of patient in vehicle at time of injury
31	Safety	Injury	Safety device worn by patient at time of injury
32	InjComment	Injury	Comment on injury.
33	EMS	Pre-Hospital	EMS Service used (Provider name)
33.1	PreHospital #	Pre-Hospital	Auto-assigned number based on the number of EMS Units entered for each patient
34	AmbRun	Pre-Hospital	Ambulance Run Number
35	ScEMSRpt	Pre-Hospital	Scene EMS Report
36	Sconditn	Pre-Hospital	Condition of patient at the scene
37	DispDate	Pre-Hospital	Dispatch date of EMS: Date that unit was notified by EMD/Dispatch, which is the 911 call date (or the day after, if the call occurred near midnight).
38	DispTime	Pre-Hospital	Dispatch time of EMS: This is the <i>Notified by Dispatch</i> time on the PreMIS form.
39	ArrTime	Pre-Hospital	Arrival time of EMS at injury scene. This is the <i>On-Scene</i> time on the PreMIS form.
40	SceneTime	Pre-Hospital	Total number of minutes spent at the scene by EMS
41	DeptTime	Pre-Hospital	Departure time of EMS: Time EMS left scene. This is the <i>Left Scene</i> time on the PreMIS form.
42	TranspTime	Pre-Hospital	Transport time of EMS
43	ArrHosp1	Pre-Hospital	Arrival time at referring hospital. This is the <i>At Destination</i> time on the PreMIS form.

Data_Point_History

No	Data Point	Tab	Data point History
1	MedRecNo	Demographics	
2	SocSecNo	Demographics	15 Aug 2003: Changed to required field and download to State. 14 May 2007: Use 000-00-0000 if Registrar looked for the SSN but it was not available
3	PFName	Demographics	15 Aug 2003: Changed to required field and download to State.
4	PMI	Demographics	May 2002 Change NTRACS Default from <Q> to Blank 15 Aug 2003: Changed to required field and download to State. 14 May 2007: Change from "Leave Blank if unknown." to: <blank> = Not Recorded (default) / = No middle name, i.e., patient is known not to have a middle name. ? = Not Available (no information on middle initial given by patient)
5	PLName	Demographics	15 Aug 2003: Changed to required field and download to State.
6	Sex	Demographics	14 May 2007: If a patient is transgender, use the sex they are at the moment they present, i.e., use current sex.
7	Race	Demographics	18 Jul 2000: Note: Cape Fear does not use all of these categories. They use only B, W, I, O. Lumbi Indian may or may not be recorded as an I. 01 Jan 2005: M for Multi Racial added as an option
8	DOB	Demographics	18 Oct 2000: If day and month of DOB are unknown, use 01/01 and year of birth so that RTS will calculate. If year unknown, leave blank (-1).
9	Man_Age	Demographics	14 May 2007: Optional data point, to be deleted from the state registry.
10	Age	Demographics	1 May 2002: Default value cannot be changed in NTRACS. Leave default value as <-5> 'til NTRACS is fixed.
11	PAddress	Demographics	15 Aug 2003: Changed to required field and download to State. 14 May 2007: Use Post Office Box address only if it is the only available address. 14 May 2007: If patient is homeless and lives at a shelter, use the shelter address. If patient is homeless and does not live at a shelter, use the word <Homeless> as the address.
12	PAddrss2	Demographics	1 Mar 2002: New data point with V3.1. 15 Aug 2003: Changed download scenario to download to State.
13	PCity	Demographics	
14	PState	Demographics	
15	PZIPCode	Demographics	18 Oct 2000: Out of country = 99999.
16	PCounty	Demographics	1 Mar 2002: New data point with V3.1.
17	PCountry	Demographics	1 Mar 2002: New data point with V3.1.

Data_Point_History

No	Data Point	Tab	Data point History
18	Occupation	Demographics	<p>18 Oct 2000: Added <Student> and <Inmate> as custom values. Student is defined as a post-high-school student with no other occupation. Students who are under 18 and in high school or under are to be recorded as minors. Students in high-school or below and over 18 are to be recorded as unemployed.</p> <p>28 Jul 2004: Expanded definition of <Professional> to include teacher, lawyer, account, banker, and technical professionals.</p> <p>14 May 2007: Expanded definition of <Public Service> to include law enforcement, meter readers, utilities, & garbage collectors</p>
19	InjDate	Injury	<p>18 Oct 2000: Added <i>Leave blank if unknown</i> to definition.</p> <p>14 May 2007: Do not estimate. Record only if in chart.</p>
20	InjTime	Injury	<p>18 Oct 2000: Added Leave blank if unknown to definition.</p> <p>1 May 2002: Note: Default cannot be changed in NTRACS. Changing default to :-4 results in :-: being displayed. Leave default as :-5 'til NTRACS is fixed.</p> <p>31 Jan 2005: V3.4 Default can now be changed</p> <p>14 May 2007: Do not estimate. Record only if in chart.</p>
21	InjCity	Injury	<p>18 Jul 2000: Note: Difficult to get. EMS form often contains street address, but not city.</p> <p>14 May 2007: Record only if in chart.</p>
22	InjState	Injury	14 May 2007: Record only if in chart.
23	InjZIP	Injury	18 Oct 2000: Out of Country = 99999.
24	InjCounty	Injury	<p>1 Mar 2002: New data point with V3.1.</p> <p>14 May 2007: Record only if in chart.</p>
25	InjCountry	Injury	<p>1 Mar 2002: New data point with V3.1.</p> <p>14 May 2007: Record only if in chart.</p>
26	ECode	Injury	<p>18 Oct 2000: For ATV incidents use 821.0 (Driver), 821.1 (Passenger), 821.8 (Other specified person, such as an unauthorized rider of an off-road motor vehicle), or 821.9 (Unspecified person, off-road motor vehicle). For Moped incidents use ecode of 812.2. For Jetski incidents use ecode of 830-838 with 4th digit of 1. For Skateboard incidents use ecode of 829.8.</p> <p>28 Jul 2004: For skateboard incidents stop using ecode of 829.8. V3.2 upgrade for NTRACS has a new ecode specific for skateboards and rollerblades.</p>

Data_Point_History

No	Data Point	Tab	Data point History
26.1	ECode2	Injury	<p>18 Oct 2000: Continue to use custom data point for this information, since Position does not always fill in correctly – especially if person was injured on animal, moped, bike.</p> <p>1 Mar 2002: Default value changed with V3.1. Continue to use custom data point due to continuing incorrect auto filling of this data point by NTRACS.</p>
27	Blunt	Injury	<p>18 Oct 2000: Use <Not Done/Doc> for other injury types, such as Drowning or Inhalation (non-burn). Use <Blunt> for Hangings.</p> <p>1 Mar 2002: <Not Available> and <Not Recorded> added with V3.0. Discontinue use of <Not Done/Doc> and <Pending> with V3.1, but</p>

Chemical Sedation List

The following procedures and medications are those that identify a patient as “Chemically sedated” for

Procedures that identify a patient as “Chemically sedated”

RSI = Rapid sequence intubation

Medications that identify a patient as “Chemically Sedated”

1. Analgesics, Opioid: Alfentanil HCL, Anexsia, Buprenorphine HCL (Buprenex), Butorphanol Tartrate (Stadol), Codeine, Demerol, Fentanyl (Duragesic), Morphine, Vicodin, Zydone
2. Anti-anxiety: Alprazolam (Xanax), Buspirone (Buspar), Chlordiazepoxide HCL (Librium), Diazepam (Valium), Doxepin HCL (Sinequan), Droperidol (Inapsine), Hydroxyzine (Atarax, Vistaril), Librax, Limbitrol, Lorazepam (Ativan), Meprobamate (Equanil, Miltown), Oxazepam (Serax), PMB
3. Antiemetics: Benzquinamide, Chlorpromazine (Thorazine), Cyclizine (Marezine), Dimenhydrinate (Dramamine), Diphenhydramine (Benadryl), Dolasetron Mesylate (Anzemet), Dronabinol (Marinol), Emetrol, Granisetron (Kytril), Hydroxyzine (Vistaril) Metoclopramide (Reglan), Ondansetron (Zofran), Perphenazine (Trilafon), Prochlorperazine (Compazine), Promethazine (Phenergan), Scopolamine (Transderm Scop), Thiethylperazine Maleate (Torecan), Trimethobenzamide (Tigan)
4. Antiepileptics/Anticonvulsants: Acetazolamide (Diamox), Carbamazepine (Tegretol), Clonazepam (Klonopin), Diazepam (Valium), Phenobarbital, Phenytoin (Dilantin), Topiramate (Topamax)
5. Antimaniacals: Divalproex (Depakote), Lithium
6. Antipsychotics: Chlorpromazine (Thorazine), Clozapine (Clozaril), Etrafon, Fluphenazine (Prolixin), Haloperidol (Haldol), Loxapine (Loxitane), Thioridazine (Mellaril)
7. Neuromuscular Blocks: Atracurium Besylate (Tracrium), Doxacurium Chlorida (Nuromax), Metocurine Iodide (Metubine Iodide), Mivacurium Chlorida (Mivacron), Succinylcholine Chlorida (Anectine), Tubocurarine Chloride, Vecuronium Bromide (Norcuron), Pancuronium (Pavulon)
8. Sedatives: Butabarbital Sodium (Butisol), Chloral hydrate, Etomidate (Hypnomidate), Ethchlorvynol (Placidyl), Flurazepam (Dalmane), Mephobarbital (Mebaral), Midazolam (Versed), Pentobarbital (Nembutal), Propofol (Diprivan), Quazepam (Doral), Secobarbital Sodium, Triazolam (Halcion), Zolpidem Tartrate (Ambien)
9. Skeletal Muscle Relaxants: Baclofen (Lioresal), Chlorzoxazone (Parafon Forte), Diazepam (Valium), Methocarbamol (Robaxin), Norgesic, SOMA, Tizanidine (Zanaflex)

EMS_Drug List

The Drugs listed in the left-hand column below should be the only drugs used in the Pre-hospital and Referring Hospital Drug fields. Please be sure that you copy values exactly as listed below (spelling, punctuation, and case). All values listed will fit in the NTRACS choice field (30 characters). Note that *[sp]* indicates that you should space between the characters, do not type *[sp]*, but rather just press the space bar once for every time *[sp]* appears. You do not have to enter the entire list in your program, you may enter only those that you use. You may also list the AKA in the Description Field if you want.

If you need to add any other values, please **first** contact Holli Hoffman or Chad Lohmeier to have the values added to the approved list.

Drug - Generic	AKA
Abciximab	Reopro
Acetaminophen	Tylenol
Adenosine	Adenocard
Albuterol	Airet, Proventil, Ventolin, Volmax, Salbutamol
Alprazolam	Xanax
Aminocaproic[sp]acid	Amicar
Aminophylline	Phyllocontin, Truphylline
Amiodarone	Cordarone
Amyl[sp]Nitrate	
Antibiotics	Ampicillan, Ancef, Keflex, Penicillan
Aspirin	
Atenolol	Tenormin
Atropine	Homatropine, Scopolamine
Blood	
Bretylium	
Bumetanide	Bumex
Calcium[sp]chloride	CaCl, CaCl2
Calcium[sp]gluconate	CaGluc
Cefazolin[sp]sodium	Ancef, Cephalosporin
Celecoxib	Celebrex
Charcoal	
Cimetidine	Tagamet
Cisatracurium[sp]besylate	Nimbex
Clonidine	Catapres, Clonidine HCL
Clopidogrel	Plavix
Colloid[sp]solution	
Crystalloid[sp]solution	
Cyanide[sp]poison[sp]kit	Amyl Nitrate
D10	
D10W	
D25	
D50	
D50W	Dextrose
D5-1/2NS	
D5-1/4NS	
D5LR	D5-Lactated Ringers
D5NS	D5-Normal saline
D5W	
Dexamethasone	Decadron
Diazepam	Valium
Digoxin	Lanoxicap, Lanoxin, Digitex

EMS_Drug List

Diltiazem	Cardizem, Cartia XT, Diltiazem HCL, Taztia, Tiazac
Diphenhydramine	Benadryl
Dobutamine	
Dopamine	
Droperidol	Inapsine
D-Tetanus	Diphtheria-Tetanus
Epinephrine	Adrenalin
Epinephrine[sp]1:1000

Lopressor	Metoprolol
Lorazepam	Ativan
Lovenox	Enoxaparin
Maalox	
Magnesium[sp]sulfate	
Mannitol	
Meperidine	Demerol
Meperidine	
Metaproterenol	Metoproterenol
Methylene[sp]Blue	
Metoclopramide	Reglan
Midazolam	Versed
Milrinone	
Morphine	Morphine sulfate
Nalbuphine	Nubaine
Nalmefene	Revex
Naloxone	Narcan
Nasal[sp]spray[sp]decongestant	
Nifedipine	Adalat, Procardia

EMS_Drug List

Nitroglycerine	
Nitrous[sp]oxide	
Norepinephrine	Levarterenol, Noradrenaline
Normal[sp]saline	
Ondansetron	Zofran
Oral[sp]glucose	
Oxygen	
Oxytocin	
Phenobarbitol	
Phenytoin	Dilantin
Plasma[sp]protein[sp]fraction	
Platelet[sp]glycoprotein[sp]inhib	Platelet glycoprotein inhibitor
Potassium[sp]chloride	KCl, K-Dur, K-Lor, K-Tab, Kaon CL, Klorvess, Slow-K, Ten-K, Klotrix, K-Lyte CL
Pralidoxime	Protopam chloride
Procainamide	Procan SR, Promine, Pronestyl, Pronestyl-SR
Procaine	
Prochlorperazine	Compazine
Promethazine	Phenergan
Proparacaine	
Propofol	Diprivan
Propranolol	Betapace, Clocardren, Cartrol, Corgard, Inderal, Inderal LA, Kerlone, Levatol, Lopressor, Normodyne, Sectral, Tenormin, Toprol-XL, Trandate, Visken, Zebeta
Ranitidine	Zantac
Rocuronium	Zemuron
Silvadene[sp]cream	
Sodium[sp]bicarbonate	
Sodium[sp]chloride	NaCl, Salt
Sodium[sp]nitroprusside	Nitroprusside
Solucortef	Hydrocortisone sodium succinate
Solumedrol	
Sterile[sp]saline	
Sterile[sp]water	
Streptokinase	
Succinylcholine	Succinylcholine chloride, Anectine
Terbutaline	Brethaire, Brethine, Bricanyl
Tetanus[sp]toxoid	
Tetracaine	Ak-Taine, Ak-T-Caine, Alcaine, Ocu-Caine, Ophthaine, Ophthetic, Opticaine, Pontocaine, Spectro-Caine
Thiamine	Vitamin B1
Thrombolytic[sp]agent	
Tirofiban[sp]hydrochloride	Aggrastat
TNKase	
Total[sp]parental[sp]nutrition	TPN
TPA	
Urokinase	
Vasopressin	Pitressin
Vasotec	Enalapril maleate
Vecuronium	Vercuronium bromide, Norcuron
Verapamil	
Warfarin	Coumadin
