Anita,

Another comment from an NCHICA member that I am not sure got to you directly for inclusion in the public comments. I have bcc's the individual who provided so they can verify a send by a different channel and if they want to be attributed with the comment but wanted to make sure this got in by the deadline.

We should ask the HIE vendor to support all the data elements in the main disease and procedure registries. The use of these registries will get a big push from CMS soon. They already require participation in a registry for reimbursement for some cardiology procedures.

Regards,

- Holt
